

CODE EVALUATION

CRITERIA

Criteria	Description	Percentage of Overall Points
Code Quality	Measures code readability, organization, and correctness.	20%
Algorithm Efficiency	Evaluates the speed and resource-efficiency of the code.	20%
Utilization of Technology Stack	Assesses the appropriate use of new technologies and cross-platform compatibility.	14%
Security & Fault Tolerance	Checks for data protection measures and error handling.	12%
Performance	Measures system speed, responsiveness, and resource usage.	16%
Development Process	Evaluates the project management and teamwork aspects.	10%
Documentation & Testing	Assesses the clarity of explanations and the thoroughness of testing.	8%
